

TMS Therapy for OCD

H7 COIL & TREATMENT INDICATION

TMS therapy with the H7 coil is an ***FDA-cleared treatment option*** for Obsessive-Compulsive Disorder (OCD).

About TMS for OCD

- Greenbrook offers a novel mechanism to alter neural network dysfunction & **alleviate symptoms of OCD**
- Proven to work even in those who **don't respond** to other treatments
- **38.1% response** v. 11.1% sham*
- **H7 coil** has key technical differences from H1 coil for MDD:
 - *Different coil shape*
 - *Different pattern of stimulation targeting the medial frontal lobes*
- Used in conjunction **with SSRIs**
- **No major side effects**
- **Non-invasive, non-systemic, & no downtime**

AVERAGE TREATMENT PLAN**

6
WEEKS

5 DAYS
EACH WEEK

20
MINUTES
